pathogens

Reg. nº F0003940/2029

Bioradis Sol

Fertigation or spraying product.

Soluble powdered endomycorrhizal inoculant enriched with PGP.

Properties and effects

- ✓ Provides a larger surface area for water and nutrient uptake.
- ✓ Promotes the formation of secondary roots.
- ✓ Increases crop productivity and supports soil microbial activity.
- ✓ Concentrated and soluble product, easy to apply.

How to use

Apply via irrigation at the beginning of the crop: 1-2.5kg/ha (the indicated dose can be divided into 2 applications spaced 1 week apart).

FiBL

CONTENT: Mixture of 5 species of arbuscular mycorrhizal fungi and 4 species of PGP bacteria of the Bacillus genus.

SUPPLIED IN: 50g, 1kg (box of 12 units), and 5kg.

Recommended: Vegetables, Extensive, Fruit trees, Citrus, Olive, Ornamental, Nursery and seedbed, Vines, Tropicals.
